

# Basic Summary

## Usability Testing

The application's graphic user interface (GUI) has been well done; very nice color combinations, eye pleasing. Except for the issue of Help icon, where the data on screen is displayed in Zoomed style.

Following is the **Usability Score scale**, where 10 mean best usability layout and workflow combinations used and 1 means least.

## Functionality Testing

The functionality of the application has some basic flaws. Based on the intended use of the client, the workflow has issues as noted in the report.

Following is the **Functionality Score scale**, where 10 mean best usability layout and workflow combinations used and 1 means least.
